1. Introduction.....	3
2. Section 1.4 is added as follows	3
1.4. End date of the BRIO.....	3

1. Introduction

This Addendum to the BRIO has been submitted to the BIPT on the December 21th 2021.

It concerns a new section added to the BRIO. This new section refers to the end date of the BRIO. Beyond that date the BRIO is no more valid.

2. Section 1.4 is added as follows

1.4. End date of the BRIO

The BRIO service provision will stop to exist as from 31/12/2023. This concerns the BRIO (the Fixed Reference Interconnect Offer), all its addenda and all annexes (therefore also the Planning and Operations and the Service Agreement Level).

Orders relating to capacity increase or re-arrangement of the Interconnection will be accepted and executed only until 31/12/2022.

New requests for interconnection based on the BRIO interconnection offer will no longer be considered as reasonable as from 1/4/2022. We refer interested parties to the VoIP IC interconnection offer if interested to interconnect with Proximus.

Until 2 months after entry into force of this addendum, this is until 1/6/2022, Proximus will accept officially requests for the migration from TDM towards VoIP Interconnect. Both parties will agree on an acceptable planning lasting maximum 1 year and ending before 31/12/2023. Proximus will not close the TDM interconnection as long as this migration is not finalised.

Two months after the entry into force of this addendum, this is after 1/6/2022, any request for migrating an existing interconnection from TDM toward VoIP will no longer be considered as a reasonable request. Proximus will not guarantee a timely migration. In this case we reserve the right to close the TDM interconnection as from 31/12/2023 even before this migration to IP is finalised.

End date of BMRIO

Addendum n°1 to the Proximus Mobile Reference Interconnect Offer (BMRIO) valid as from 01/4/2022

2. Section 1.4 is added as follows	3
1.4 End date of the BMRIO	3

1. Introduction

This Addendum to the BMRIO has been submitted to the BIPT on the December 21st 2021.

It concerns a new section added to the BMRIO. This new section refers to the end date of the BMRIO, beyond that date the BMRIO is no more valid.

2. Section 1.4 is added as follows

1.4 End date of the BMRIO

The BMRIO service provision will stop to exist as from 31/12/2023. This concerns the BMRIO (the Mobile Reference Interconnect Offer) and all its annexes.

Orders relating to capacity increase or re-arrangement of the Interconnection will be accepted and executed only until 31/12/2022.

New requests for interconnection based on the BMRIO interconnection offer will no longer be considered as reasonable as from 1/4/2022. We refer interested parties to the VoIP Mobile IC Interconnection Offer if interested to interconnect with Proximus' mobile network.

Until 2 months after entry into force of this addendum, this is until 1/6/2022, Proximus will accept officially requests for the migration of existing interconnections from TDM towards VoIP Interconnect. Both parties will agree on an acceptable planning lasting maximum 1 year and ending before 31/12/2023. Proximus will not close the TDM interconnection as long as this migration is not finalised.

Two months after the entry into force of this addendum – this is after 1/6/2022, any request for migrating an existing interconnection from TDM toward VoIP will no longer be considered as a reasonable request. Proximus will therefore not guarantee a timely migration. In this case we reserve the right to close the TDM interconnection as from 31/12/2023 even before this migration to IP is finalised.
