

Agreement

on the co-ordination of the band 146 – 174 MHz

concluded between the administrations of

Belgium, France, Germany, Luxembourg,

The Netherlands and Switzerland

Groningen

October 2002

**Agreement
on the co-ordination of the band 146-174 MHz
concluded between the Administrations of
Belgium, France, Germany, Luxembourg,
The Netherlands and Switzerland.**

1. Aim of the Agreement

This Agreement allows an equitable access to the frequency band 146-174 MHz in the border areas between the countries concerned.

This Agreement is containing a division of the band 146-174 MHz into preferential frequencies as specified in the latest version of the Vienna Agreement.

2. Technical parameters

The duplex spacing is fixed at 4.6 MHz. Base stations shall transmit in the upper band, mobile stations in the lower band. Simplex or duplex systems shall be assigned according to the table in Annex 1.

The preferential repartition scheme in Annex 2 is based on subbands of 25 kHz. Channels using a multiple of 12.5 kHz can only be used as preferential frequencies if they do not exceed the bandwidth of a preferential frequency or a bloc of preferential frequencies as given in Annex 2.

3. Preferential use.

The preferential frequencies designated in Annex 2 to this Agreement may be used by the above mentioned Administrations in the indicated co-ordination zones without prior co-ordination as long as the field strength at a height of 10 m above ground does not exceed the value of 12 dB μ V/m at points located at the x km (30, 60 or 80 km subject to bi- or multilateral agreements) line beyond the border of the affected country. The curves for 10 % of the time shall be used for analogue systems. For digital systems the curves for 1 % of time shall be used.

4. Non Preferential use

Non preferential frequencies may be used by the above mentioned Administrations in the indicated co-ordination zones without prior co-ordination as long as the field strength at a height of 10 m above ground does not exceed the value of 12 dB μ V/m at points located on their border line. The curves for 10 % of the time shall be used for analogue systems. For digital systems the curves for 1 % of time shall be used.

5. Common frequencies

Common frequencies are frequencies which may be shared without prior co-ordination on the basis of bilateral or multilateral agreements under the terms laid down therein.

6. Protection of receivers

Receivers can only claim protection as far as the maximum protection range for these receivers is not exceeded.

Permissible fieldstrength	12 dB μ V/m
Maximum protection range for preferential frequencies	30, 60, 80 km (subject to bi- or multilateral agreements)
ERP of the reference transmitter	12 dBW

The ERP of the reference transmitter shall be increased by the antenna gain of the receiver in the actual direction.

The maximum protection range is calculated in the same way as the crossborder range.

7. Overview of the co-ordination zones

Zone A: 4-country case: BEL-D-F-LUX

Zone B: 3-country case: BEL-D-HOL

Zone C: 2-country case: D-HOL

Zone D: 2-country case: BEL-HOL

Zone E: 2-country case: BEL-F

Zone F: 2-country case: D-F

Zone G: 3-country case: D-F-SUI

Zone H: 2-country case: F-SUI

Annex 3 is giving an indication of the co-ordination zones.

8. Revision of the Agreement

With the consent of the other Administrations, this Agreement may be modified at the request of one of the signatory Administrations where such a modification becomes necessary in the light of administrative, regulatory or technical developments.

9. Withdrawal from the Agreement

Each Administration may withdraw from this Agreement subject to 6 months notice.

10. Languages of the Agreement

This Agreement exists in the French and English languages, both texts being equally authoritative.

One original version of this Agreement in both languages is handed over to each signatory administration.

Cases of differences in the provisions of the English and French texts of this Agreement and their interpretation should be discussed between the signatories to this Agreement and should be resolved with the consent of all signatories to this Agreement.

11. Date of entry into force

The entry into force of this Agreement shall be subject to the signing of additional bi- or multilateral agreement(s) within which the detailed implementation of the provisions of this Agreement in the bi- or multilateral relations, the transitional arrangements and the validity of entries in the frequency register are laid down. In absence of bi- or multilateral agreements Administrations should endeavour to base new assignments on the preferential repartition as given in Annex 2. All signing Administrations shall receive a copy of bi- or multilateral agreements based on this Agreement.

DONE at GRONINGEN on 24th of October 2002

For BELGIUM
